Jet[®]

jet[®]

Designer Jet de Bruijn creates interior products under the label **jet**. Clean-lined products manufactured out of pure materials. The 'Tammel' lights range forms a reference to her childhood - Tammel being the name of the farm where she grew up on. This is where her predilection for craftsmanly techniques and the application of wood and steel originates. **jet** is synonymous with design, expressed in powerful simplicity, honest quality and attention to detail.
